Did you know:

- Ticks and Lyme are spreading rapidly all across Canada.
- Canadian scientists predict that by 2020, **80% of the population in Eastern Canada** will be living in a tick populated area.
- Lyme Disease is often called "**The Great Imitator**" because its symptoms mimic many other diseases including Fibromyalgia, Chronic Fatigue, MS, ALS and various psychiatric illnesses including depression. Lyme can affect any organ of the body.
- The **Lyme bacteria** can be passed **from pregnant mother to her child in the womb**.
- All Canadians are at risk.

Presentations:

- What is Lyme Disease?
- Can Lyme Disease be Transmitted from Mother to Child in Pregnancy?
- Current Research
- Challenging Canada's Current Lyme Paradigm
- Integrative Functional Medicine Approach to Lyme & Co-Infections
- Q&A
